STUFF's Faculty Evaluation Survey Results

90% Of Semester One Courses Polled In First Student-Run Survey

With this issue of STUFF, the results of Saint Joseph's College first student-run course/instructor evaluation survey are presented. The survey form and questions asked were taken from Purdue University's much-respected and widely-used faculty evaluation poll. With the financial assistance and advice of the college Department of Institutional Research and the Student Association, STUFF initiated, directed, and finally administered the survey last December 10 and 11 in selected classes.

A total of 160 classes were evaluated—over 90% of the total number possible. The approximate 10% that were not surveyed was due to teachers refusing to be evaluated, and because of the heat breakdown which forced classes to be cancelled. Once classes were resumed, conflicts often arose with final examinations and other factors.

Starting below and continuing on succeeding pages, the survey results are presented by faculty members in alphabetical order:

TEACHER'S NAME is followed by the course number and total number of students in the class. Only one section of each course was surveyed unless a special request was made by the teacher. When a faculty member taught more than one course, his name is omitted before his other courses.

PERCENTAGE of students in each class surveyed is given so that a clearer picture of the testing sample is possible.

MEAN SCORES for the entire faculty are given after the 14 questions asked. This will give you a basis of comparison for each teacher's ratings. The mean scores for each individual teacher are given in the double row below the percentage figure. Questions 1-7 are given in the top row, and 8-14 in the bottom row.

1. Clarity of instructor's policies—grading, attendance: 4.23

8. Instructor's presentation of material: 4.28
9. Confidence in instructor's assigning fair grade: 4.43
10. Instructor's ability to relate course material to other subjects: 4.11
11. Suitability of texts and printed material to course content and goals: 4.13
12. Degree of intellectual stimulation in this course: 3.89

ACKNOWLEDGMENTS

STUFF wishes to extend its thanks and appreciation to the many individuals who participated in the course/instructor evaluation survey: Dr. Martin Ryan of the Department of Institutional Research, Jim Stoup and Dan Moloney of the Student Association, the more than 40 student volunteers who administered the survey in the classrooms, and the faculty, who agreed to let themselves be rated. Without the help of these people, an already complex task would have been made far more difficult.
